

Lighting Your World

Better lighting for
people and planet.

A Natural Evolution

Our collective understanding of the built environment has evolved dramatically over the last decade.

Sustainable design has driven a whole new way of thinking about buildings. One that balances people, planet and profit.

From schools to offices, right through to correctional facilities, we're learning that thoughtfully designed environments, ones that bring together aesthetics, efficiency and longevity, are positive for both people and businesses. And as technology advances, the role of lighting will continue to evolve and expand, especially as lighting controls drive personalisation and deliver value beyond lighting.

Now fast approaching 50 years as a market leader, Eagle Lighting continues to respond to this evolution with innovative, customisable and sustainable lighting solutions.

From our origins as a custom-lighting manufacturer to becoming one of Australia's leading lighting specialists, local manufacturing and customisation have remained at the core of our business. This capability allows us to deliver precise solutions for our customers' unique projects. But beyond that, when selecting Eagle Lighting, all stakeholders get the peace of mind of working with

a genuine local manufacturer. This includes our in-house expertise, certified quality assurance, no supply-side disruptions, and the flexibility to meet demanding delivery schedules.

To further enhance our offer, an increasingly important focus for our business is sustainability and social responsibility.

Underpinned by our values of collaboration, quality and respect, by working closely with our clients, we continue to deliver quality solutions that benefit end-users within efficient buildings.

We look forward to working with you to deliver projects that provide 'better lighting for people and planet'.

At Eagle Lighting, we're here to brighten up your life.

Our lighting solutions provide a positive experience for everyone. From the end-users, who need quality lighting for healthy and productive environments, to building owners and facility managers, who get an energy-efficient, sustainable, and easy-to-control solution.

All project stakeholders get something they won't find anywhere else: genuine local manufacturing

coupled with expert advice and a comprehensive portfolio of luminaires.

At Eagle Lighting, our collaborative approach, local technical expertise, and decades of experience come together to create lighting solutions that deliver exceptional results for everyone.

Eagle lighting — making the world a brighter place, for people and planet.

50+ Years in the business has taught us one thing

Bright ideas shine when we work together

Here's how we work with you to find the perfect solution to light up your spaces.

Collaboration

Your challenges are our challenges.
We sit down with you to understand your biggest design problems and develop a plan to solve them.

Comprehensive solutions

There's no lighting problem we can't solve.
Drawing on our locally manufactured luminaires, and complemented by best-in-class European brands, our designers create lighting solutions that are elegant, efficient and tailored to your space.

Technical support

We're here to answer even your most technical questions.
Our in-house engineering, lighting design, and product specialists are industry-leading technical experts. And being local, you can get engineering support from the people who design, test and manufacture our primary luminaires.

Quality

Your spaces are valuable.
Let's work together to design livable, long-lasting, energy-efficient spaces and maximize the value of your building.

Customisation

Lighting isn't one size fits all.
Select one of our standard products or work with us to design a custom solution for your project.

Local manufacturing

Don't let the supply chain stop your project in its tracks.
Thanks to our in-house design, testing and manufacturing capabilities — 90% of our components come from Australian companies — you can rely on us to meet even the most demanding schedule.

Delivery

We're here to ensure your luminaires arrive on time and in perfect condition.
Thanks to our thorough, ISO accredited, Integrated Management System, and our in-house and third-party distribution centres, you can rest assured you're in safe hands.

Working together. What a bright idea.

Great lighting starts with you.

That's why we take some time to understand your business and your objectives. We measure your space and meet your staff. We listen to your challenges and concerns. It's a more personal, collaborative approach to lighting.

That's the Eagle Lighting difference.

Let's make the world a brighter place [📧](#)

Designed for life

Lighting any environment takes more than a few strategically positioned LEDs.

Our lighting specialists consider a host of factors — from efficiency to ambience, colour rendering to circadian rhythms — to create sustainable spaces that are sensitive to both people and planet.

At Eagle Lighting, we apply our deep knowledge of the latest science to develop luminaires and lighting designs that enhance occupant vision, wellbeing and performance.

This creates value beyond simply saving energy. It makes your business brighter.

The local experts

You can customise existing luminaires, or choose from our standard product range, to achieve the optimal lighting for your space. Eagle Lighting's expert consultants, engineers, and lighting designers work with you to take your lighting concepts from idea to reality.

1000+

Customised product designs each year

120,000+

Light fittings locally manufactured annually

Engineered to perfection

Our clients need to know they'll receive consistent, quality solutions, on time and to specification.

With 60 years of combined industry experience, our engineers are experts in product design, photometric testing and machine programming. They can quickly turn theoretical concepts into tangible solutions. It's why every Eagle Lighting product meets the highest standards and comes with unparalleled technical support.

With Eagle Lighting, you're in safe hands.

Photometric Laboratory

Our National Association of Testing Authorities (NATA) accredited photometric laboratory further strengthens our capabilities - accelerating product development and ensuring light quality is maximised.

Thanks to this rigorous testing, you can rest assured that every Eagle

Lighting product meets or exceeds industry standards.

Our passion for quality can be clearly seen in every product, at every tier. There's no-one who can light your space better.

WORLD RECOGNISED
ACCREDITATION

With the capability to design, prototype and test in-house, we can design your optimal lighting solution within a matter of days.

Locally Manufactured

The construction industry needs partners that can be relied on — flexible, agile and innovative.

Thanks to ongoing investment in our state-of-the-art facility in Melbourne, we can manage the whole manufacturing process — from concept to installation. This ensures better quality control, greater customisation and faster production times.

This level of control also means that we can constantly adapt. When technology changes, when our processes improve, when we shift our

production philosophy, when design evolves, our clients are the ones who reap the benefit.

What does this mean for you?

Fast, efficient and accurate production, a high level of customisation, no supply-side disruptions, quality assurance, local support, and the ability to meet even the most demanding schedules.

In other words, satisfaction guaranteed.

Making the world a brighter place

There's an increasing demand within the construction industry for environmentally conscious partners.

Advances in LED lighting technology provide the easiest pathway to reduce carbon and greenhouse gas emissions generated in the built environment.

But at Eagle Lighting, we want to go further...

Our design and manufacturing methodology is driven by circular thinking — in production, investment and technical innovation. That means we think carefully about the entire lifecycle of each of our luminaires:

how they're designed, what they're made of, their process of manufacture, and how they'll eventually be recovered and recycled.

We're passionate about offering sustainable, creative solutions that combine a quality product with a quality outcome.

This environmental commitment is hard-coded into all aspects of the business. Our goal is to offer luminaires with the smallest possible footprint that positively impact both people, places and planet.

[Learn More](#) 

Circular Economy

Our “Circular Economy Review 2020” has resulted in:

- A 100kW solar system for the manufacturing facility reducing the factory CO2 emission levels by at least 10%.
- Furthering our work in the circular product development space.
- Deepening our commitment to local and responsible sourcing as part of our Sustainable Business Strategy.
- Creating sustainability KPI's for Production, Engineering, Logistics, Quality & Environmental and Purchasing.
- Reviewing our ISO IMS to ensure it

aligns with sustainability, CE principles and social responsibilities.

- Reviewing our waste management policies/procedures to ensure we are recycling all waste.
- Each of our offices now has a ‘Green Team’ to oversee recycling and generate sustainable ideas for the business.

UN sustainability goals:

We have identified an initial 5 of the 17 UN ‘Sustainable Development Goals’ where we can have the most impact.

Our goal is to create concrete, measurable and far-reaching targets for the next five-year period.

A social & environmentally conscious business

Our approach to sustainability covers three areas: the people, the business and the environment. In short, this means we care for the environment, practice sound business ethics and look after our employees.

Sustainability is as much a part of our culture and people as it is our design, manufacturing and technology.

As a proud Australasian manufacturer, we're part of the local community.

We hire local employees, support local causes, buy from local suppliers, and commit to local environmental targets.

We're deepening the work we do in regards to local jobs, community causes, sustainability and environmental outputs — both for ourselves and our suppliers.

Our aim is to become Australasia's most socially and environmentally conscious lighting solutions provider.

The future is bright

The ever-changing environments where people work, play and live mean that lighting expectations and demands are increasing.

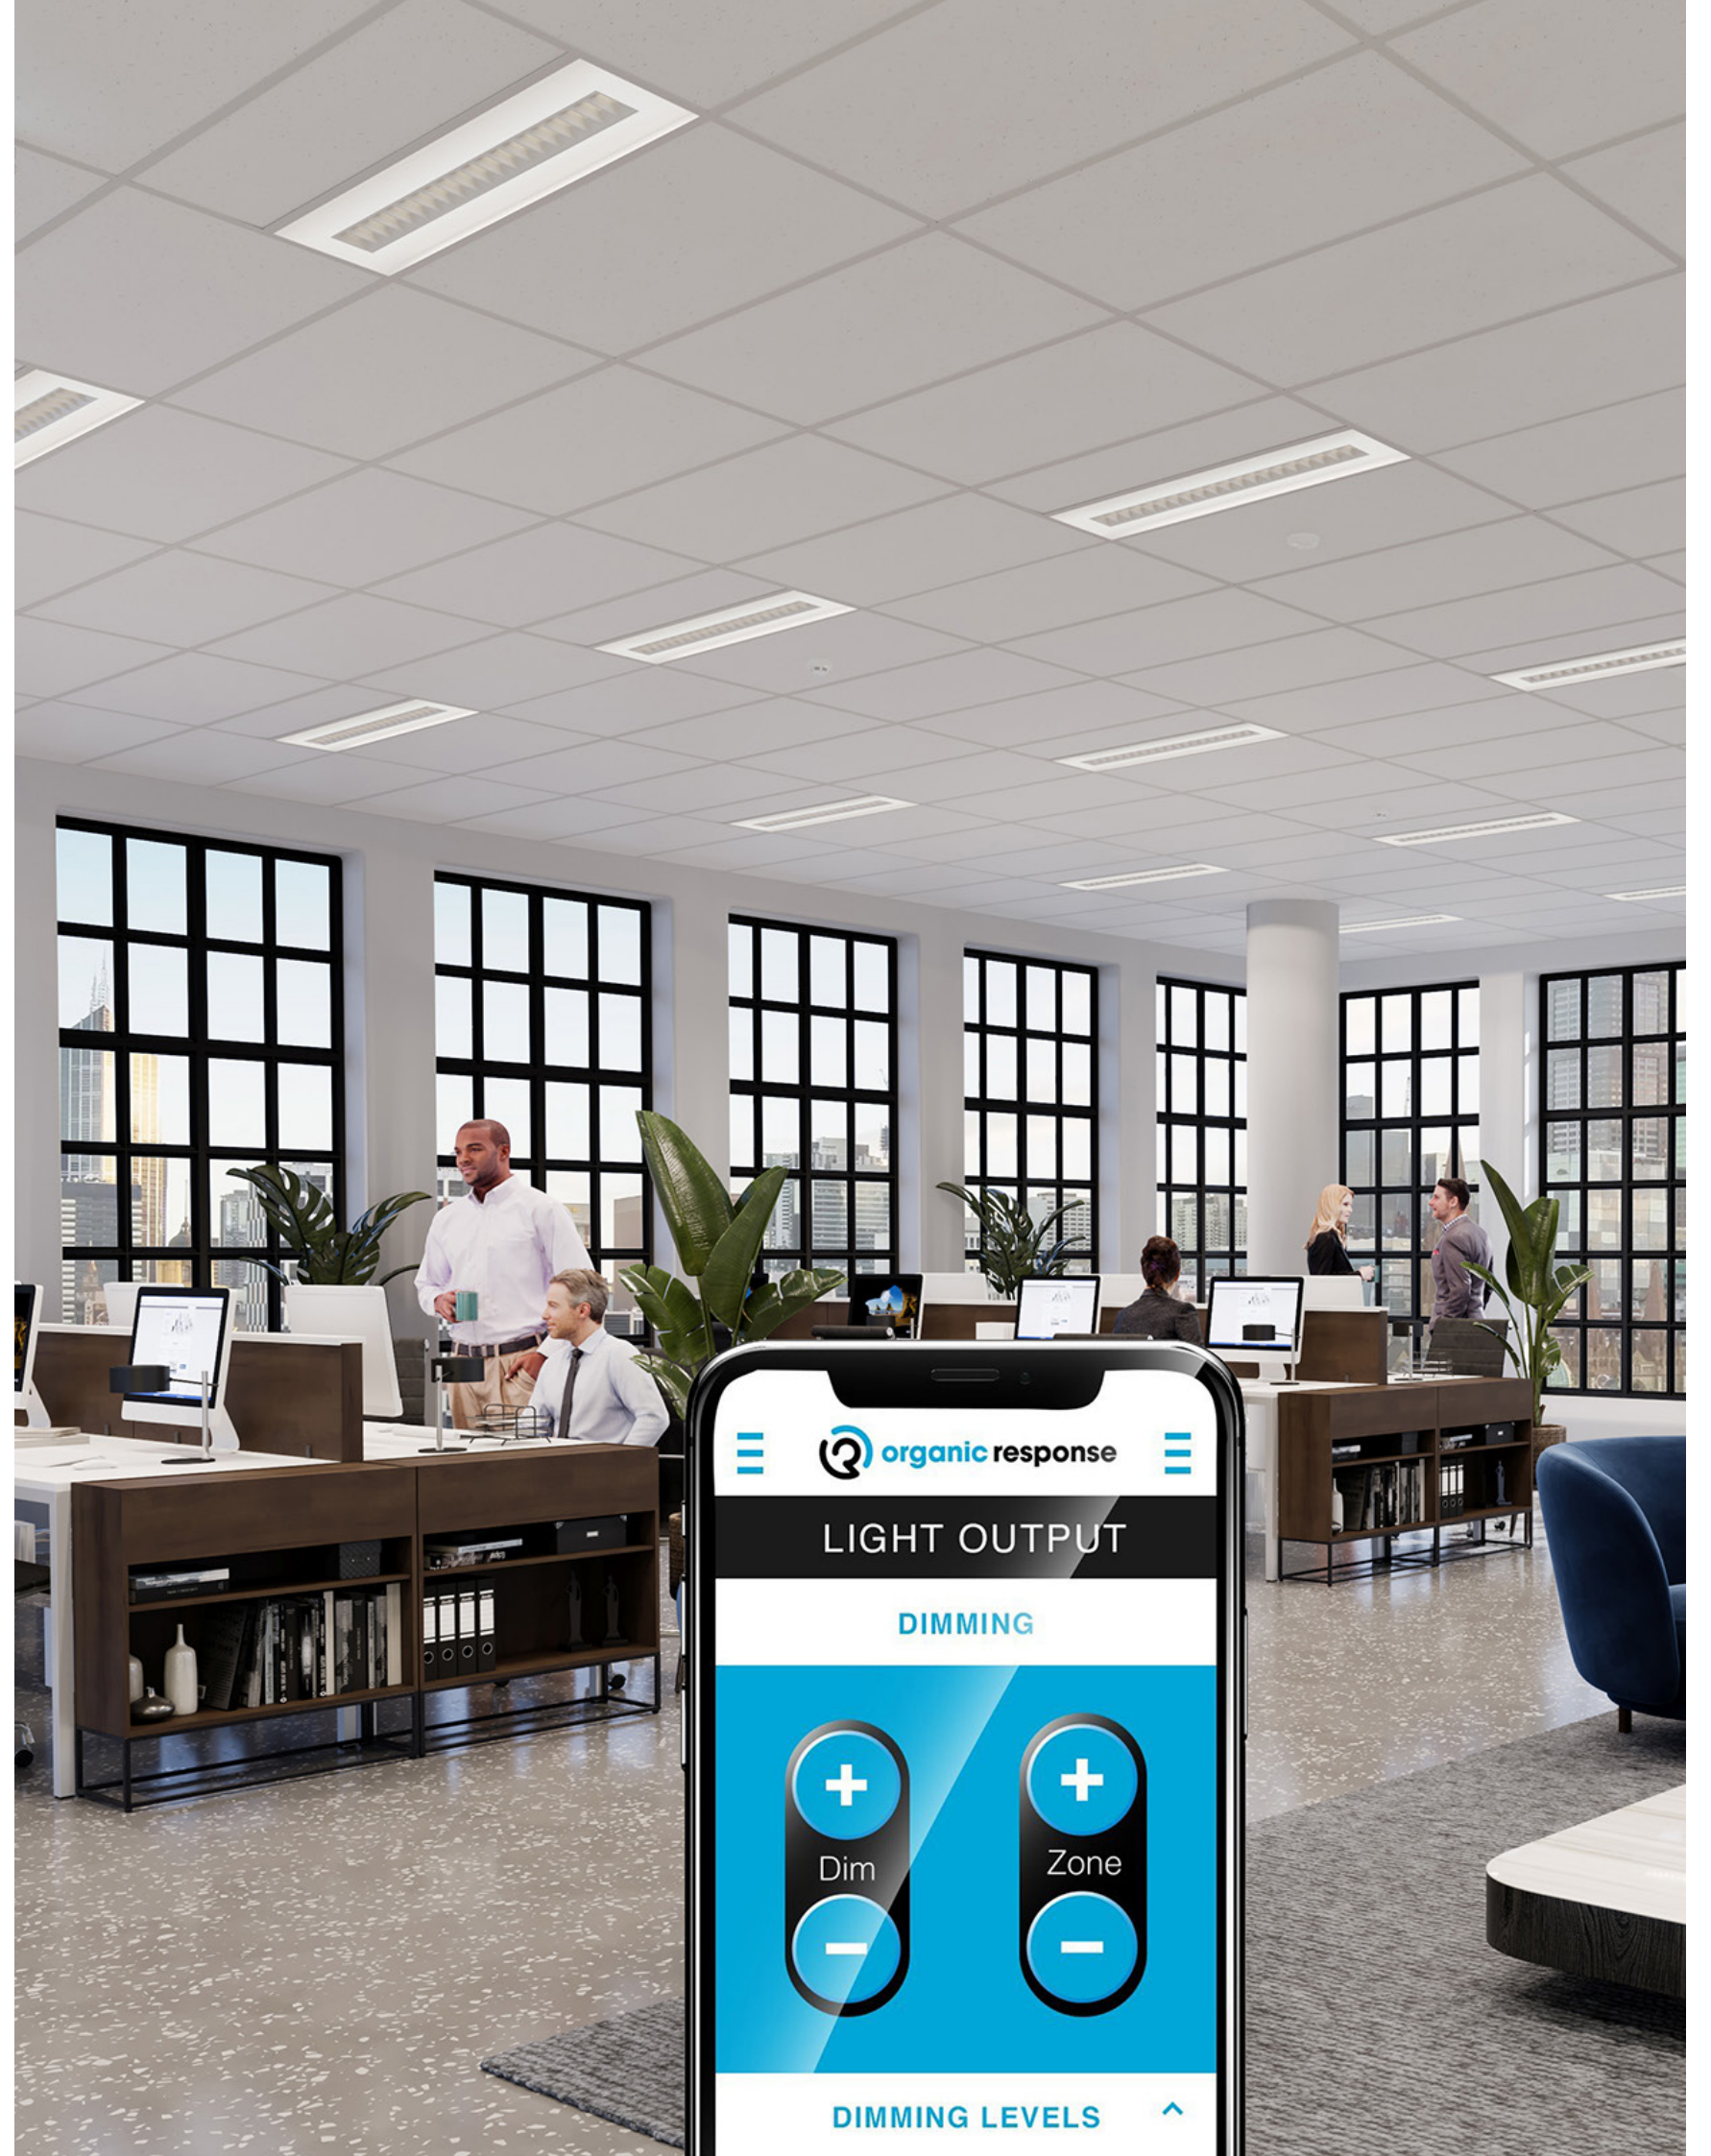

With that in mind, at Eagle Lighting we collaborate closely with our clients to help them find the right control solution for their unique projects.

With a passion to push the performance of lighting, our future-orientated approach ensures that we develop

luminaires that maximise the latest in technological developments, personalisation and data.

And with integration of advanced control options into our luminaires, such as our Organic Response solution, your facility can adapt seamlessly to advances in IoT technology, without the higher costs associated with legacy-cabled lighting control systems..

Local Solutions, Global Perspective.

Being a Fagerhult Group company lets us complement our locally manufactured range with industry-leading products sourced via the global Fagerhult Group — providing our clients with a complete portfolio of best-in-class luminaires.

Having access to this network allows

us to explore and leverage global and local trends in lighting, controls and connectivity solutions, while being able to implement them on the ground for our customers.

It also means we can draw on a wealth of technical knowledge and experience across an array of application areas.

We love being out on the road, holding education sessions on topical subjects from the world of lighting.

If you'd like to discover more about our educational presentations, please contact your ELA representative or [get in touch here](#). 

Comprehensive Solutions

Between our global network and in-house design, testing and manufacturing, there's no lighting problem we can't solve.
